## **City is Working to Repair Water Main Break in East Ward**

TRENTON, N.J. — On Saturday morning at 12:30 a.m., a 24-inch water main beneath Walnut Avenue between Olden and Garfield Avenues burst. Trenton Water Works crews, Fire and Emergency Services, Police, PSE&G, and emergency water contractors, were activated and responded to the event. Residents in the immediate area are fine, and we are in the process of repairing the main. Trenton Water Works customers in the Hamilton Township area may experience low water pressure for several hours. The water main break has not impacted water quality. Customers with questions about water pressure or quality can call Trenton Water Works at (609) 989-3222.
