INCLEMENT WEATHER ADVISORY

As inclement weather is forecast by the National Weather Service with up to five inches of snow, City Public Works crews, including contract vendors are readying equipment and work details to begin snow removal operations once the snowfall reaches two inches. Tenants without heat should phone the Department of Inspections No-Heat Hotline at (609) 989-3560. We will continue to monitor the weather event and adjust our response as needed. For emergencies, dial 911. For non-emergency assistance, please (609) 989-4170. Please stay off roads and be mindful of parking along designated snow emergency routes. If necessary, move your car from snow emergency routes to the nearest public school parking lot. Everyone, be safe, dress appropriately, and use good judgement when venturing outside in the bitter cold. Please share this post with family and friends.
