**EXCEPTIONS  
(IF NONE, PLEASE NOTE)**

**BIDDERS SHALL INSERT EXCEPTIONS ON THIS PAGE**

- ① Width Pickup = 32" spec calls for 33"
- ② Width Loadout = 32" spec calls for 33"
- ③ Fuel Tank for RX600e is 250 gal.
- ④ Water tank for RX600e is 600 gal
- ⑤ DEF capacity for RX600e is 10gal. You still have to fill everyday.
- ⑥ Operator's control station had one on either side of machine  
for quick, convenient ability to move positions.
- ⑦ Roadtec has their version of PTS Technology called "Auto cut" and  
it does the same thing.
- ⑧ Multi positional ignition is "OFF, Battery power, ON" separate switch  
for work lights.
- ⑨ We offer 2 pallets of Kennametal RK2-02P teeth, these are  
our version of the W5L20 teeth.

\* Under Section IV: Brand names, patents, and standards of Quality  
Subsection 5"D" states "only manufactured and farm products of  
the United States, wherever available, shall be used on this  
contract pursuant to N.V.S.A. 40A:11-18". See Attached.

### Exceptions Continued:

- No selectable drum speeds
- ✓ -No window in the rear moldboard.
- ✗ -Grade control- We do not display the sensitivity in the home screen. This is shown in the settings screen.
- ✓ -No remote drum turning device

### Hydraulic system and Ground Drive sections

- B. 10-micron combination suction/return line filter(s) -100 mesh suction / 3 micron return
- C. 6-micron filter(s) on charge pressure side of traction pump- 5 micron on charge filters for pumps
- D. Ground Drive: Over-pressure bypass valve, over-pressure cut-off valve shall prevent excessive temperatures in the pump. Our travel pump has limiters installed for protection of the pump
- K. provide individual track speed control while turning resulting in smooth operation and minimizing undercarriage wear. Track motors use a pulse pickup to monitor the speed while turning. The natural thing for the outside motor is to speed up till the tracks come back straight. The traction control valves help with the over speeding of our track motors also.

### Instruments and Controls

- ∅ C. Clutch engagement pressure. Can see the Clutch Override Switch On & Off on Cutter Tab on Guardian cannot see the actual pressure with Guardian, Guardian shows the current going to the clutch actuator valve
- ✓ E. Fan drive pressure. It is hydraulically driven but we don't show the pressure, just the milliamps going to the valve. We are able to read milliamps on the Engine Fan Control on Engine Tab on Guardian in order to see if engine is about to overheat or if fan needs cleaning.
- ∅ F. Brake release pressure. Can see if brake is On or Off on Guardian Start Tab but cannot read the actual brake pressure.

2  
**BID PROPOSAL FORM**  
**VENDOR MUST COMPLETE**

The undersigned bidder declares that he/she has read the Notice to Bidders, Instructions to Bidders, Affidavits and Specifications attached, that he/she has determined the conditions affecting the bid agrees, if this proposal is accepted, to furnish and deliver the following:
